Garrett Rumschik

Full Stack Software Developer

Phone Number (937) 416-5998

Email rumschik.2@gmail.com

Address Buffalo, NY

Focused security engineer with expertise in system architecture design and cloud computing, driving efficiency through automation and CI/CD. Proven track record in containerization, orchestration, and optimizing performance across platforms. Skilled in API development and software development life cycle, delivering solutions that enhance operational capabilities.

SKILLS

- System Architecture Design
- Containerization and Orchestration
- Automation and CI/CD
- Software Development Life Cycle (SDLC)
- Cloud Computing
- API Development
- Python
- Performance Optimization
- Javascript
- Database Management

EXPERIENCE

Security Engineer IV
Novacoast   Mar 2025 - Present

Software Engineer
Palo Alto Networks   Oct 2023 - Oct 2024

- Led the adoption, integration, and maintenance of a Cloud-Native Application Protection Platform across multiple enterprise security divisions, resulting in a 40% reduction in security incident response times and a 30% increase in system uptime
- Collaborated with security teams to integrate diverse public cloud stacks with our platform, enhancing cross-platform interoperability and increasing data protection efficiency by 25%
- Deployed and maintained Kubernetes clusters for service integration, optimized job management, and improved load balancing
- Developed custom automation solutions in multiple programming languages to interface client platforms with our system.

Full Stack Developer
MindForge LLC   Dec 2018 - May 2023

- Developed and maintained a web application that streamlined management and communication for construction companies resulting in an increase in operational efficiency
- Designed and implemented REST APIs using Python for seamless integration with desktop and mobile applications
- Contributed to a 2-year project overhauling backend data structures and led the development of a new v2 API, improving system scalability and reducing data retrieval times
- Managed CI/CD pipelines for automated deployments, incorporating comprehensive testing that reduced deployment errors and accelerated release cycles
- Implemented caching strategies to enhance application efficiency which boosted response times and cut server load.

IT Specialist
Abercrombie & Fitch Co.   Aug 2018 - Dec 2018

- Administered and supported internal and proprietary systems
- Implemented and expanded Identity & Access Management tools.

EDUCATION

Bachelor's degree in New Media & Technology
The Ohio State University   May 2018
